30 April 2020

Dear David,

Notice of Final NTS Exit (Flat) Capacity Charges effective from 1 October 2020, and Indicative NTS Exit (Flat) Capacity Charges for the 2020 Annual Application Window for Enduring Annual NTS Exit (Flat) Capacity

This notice is issued in line with National Grid Gas ("National Grid") Transporters Licence in respect of the NTS and our obligations contained in the Uniform Network Code in relation to changes to transportation charges and to the annual application for Enduring Annual NTS Exit (Flat) Capacity. Contained in this notice are:

- i. Final NTS Exit (Flat) Capacity Charges applying from 1 October 2020.**
- ii. Updated indicative NTS Exit (Flat) Capacity Charges** for Annual NTS Exit (Flat) Capacity for Gas Years **2021/22** and **2022/23**.
- iii. Initial Indicative NTS Exit (Flat) Capacity Charges for Gas Year 2023/24** published ahead of the 2020 Annual Application for Enduring Annual NTS Exit (Flat) Capacity which will form shippers' user commitment to any NTS Exit Capacity requested in July 2020.

There are UNC Charging modifications which may affect the Transportation Charging methodology for the Gas Year starting 1 October 2020. Of note is Modification 0678 'Amendments to Gas Transmission Charging Regime' (including ten alternates) for which Ofgem published a minded to position and impact assessment on 23 December 2019 (<https://www.ofgem.gov.uk/publications-and-updates/amendments-gas-transmission-charging-regime-minded-decision-and-draft-impact-assessment>). This included a preference for October 2020 as the proposed effective date. As a decision is expected in the near future, this means there is the potential for the payable prices associated with capacity allocated and commodity charges to be impacted by such modifications.

Additional modifications may also impact the payable prices and aspects of the charging regime for the Gas Year starting 1 October 2020. Market participants are encouraged to keep up to date and engage with live UNC changes and be aware of those with Ofgem for decision via the Joint Office (<http://www.gasgovernance.co.uk/livemods> and <http://gasgovernance.co.uk/index.php/withofgem>).

Please note that the charges included in this notice are currently calculated solely on the current methodology, in line with the UNC, and will continue to be so until more certainty is available on the potential changes.

The charges have been calculated in accordance with the Gas Transmission Charging Methodology (UNC Section Y). They have been set using National Grid's Transportation Model, based on the expansion constants shown in Table 1; updated information on the target revenue recoverable through Exit charges; the transmission network; and the demands and supplies contained in the Gas Ten Year Statement 2019¹.

Table 1 : Expansion Constant²

Gas Year	Expansion Constant (£/GWhkm)
2020/21	3197
2021/22	3303
2022/23	3409
2023/24	3507

1. Final NTS Exit (Flat) Capacity Charges for 1 October 2020

NTS Exit (Flat) Capacity charges are normally updated once a year in October. This section of this notice provides details of NTS Exit (Flat) Capacity charges effective from 1 October 2020.

The Transportation Model for gas year 2020/21 (1 October 2020 to 30 September 2021) has been updated to reflect changes in supply, demand, the network, target revenue (see Table 2), and baseline Exit Capacity.

1.1 Changes from Current Charges

NTS Exit (Flat) Capacity charges effective from 1 October 2020, for each NTS Offtake, are shown in Appendix 1 to this notice (Column A). Exit Capacity charges are set annually from 1 October, with charges set such that they aim to recover the TO allowed revenue within the formula year therefore essentially being set for 12 months to recover 6 months revenue (Oct-Mar). Further information on these changes can be found in our Charge Setting Report ³.

On average the Exit Capacity charges have decreased by 0.0005 p/kWh/day.

1.2 TO Exit Commodity Charge

NTS Exit (Flat) Capacity for 2020/21 has not been booked up to the baseline. Therefore, to ensure the correct total revenue recovery from Exit shippers, the TO Exit Commodity charge continues to apply from 1 October 2020. For further details on this charge please see our Indicative Notice of Changes to Commodity Charges which has also been published on 30 April

¹ <https://www.nationalgrid.com/uk/publications/gas-ten-year-statement-gtys>

² Expansion constants for calculating exit capacity prices are fixed, once set for each Gas Year

³ Quarterly Charge setting Report Indicative October 2020 charges will be made available shortly at: <https://www.nationalgrid.com/uk/gas/charging-and-methodologies/transmission-system-charges>

2020. The Final TO Exit Commodity charge will be confirmed at the end of July when additional information from the July 2020 Application Window is available.

2. Indicative Exit Capacity Charges for 2021/22 to 2023/24

National Grid's RIIO-T1 price control took effect from 1 April 2013 and runs to 2020/21. The Indicative NTS Exit (Flat) Capacity charges for the period 2021/22 to 2023/24 have been prepared based on National Grid Gas Transmission's RIIO-2 business plan, covering the price control period from 1 April 2021 to 31 March 2026 which was submitted to Ofgem on Monday 9 December 2019. Since the RIIO-2 framework will remain under development in 2020, there remains a degree of uncertainty in the allowed revenues and therefore also the indicative charges.

2.1 NTS Exit Capacity Target Revenues

Indicative NTS Exit (Flat) Capacity charges for the years 2021/22 to 2023/24 for each NTS Offtake are shown in Appendix 1 (see columns B, C and D respectively). Forecast allowed TO Exit revenues are the main effect driving changes to Indicative NTS Exit (Flat) Capacity charges from 2021/22 onwards. Table 2 shows our forecasts for TO Exit target revenues.

Table 2: TO Exit Target Allowed Revenues

NGG Transmission Owner (TO)	2019/20 £m	2020/21 £m	2021/22 £m	2022/23 £m	2023/24 £m
Revenue to be collected via Exit charges	332.8	371.9	447.0	463.1	503.5
Collection in first half of the year	143.1	189.6	182.3	264.7	198.4
Collection required in second half of the year ⁴	189.6	182.3	264.7	198.4	305.2
Annual figure for charge setting ⁵	379.3	364.6	529.4	396.7	610.4

The change in charges at most Exit points follow movements of modelled revenue forecasts. The variation between years is mainly due to the timing differences between financial and 'gas' (October to September) years which is used to set NTS Exit Capacity charges and this effect has previously been discussed at the NTS Charging Methodology Forum (NTSCMF). There are additional uncertainties around future forecasts of supplies and demand which have resulted in some changes to the charges over the 3 years of Indicative charges.

2.2 NTS Exit Capacity charges relating to Interconnection Points (IPs)

Under the changes introduced under Capacity Allocation Mechanism (CAM) effective from 1 November 2015, Interconnection Points (IPs) have different capacity auction products, structures and timings. However, the Reserve Prices for the auctions are calculated using the same methodology as the Entry and Exit Capacity charges for non-IPs as described above.

The final and indicative IP Exit prices for Capacity from 1 October 2020 will be published in May 2020 in our Notice of NTS Annual Quarterly (Entry and Exit) Interconnection Point (IP) Reserve Prices..

⁴ As the Exit Capacity charges are set for a year from 1 October, the revenue collected in the second half of the financial year will be equal to the revenue collected in the first half of the next year.

⁵ Revenue to be used in the Transportation Model which is equal to two times the forecast revenue required in the second half of the year.

Tools and Supporting Information

Further information on revenue forecasts can be found in National Grid's Quarterly Charging report available on our website at <https://www.nationalgrid.com/uk/gas/charging-and-methodologies/transmission-system-charges>

If you have any questions about this notice, or require any further explanation of the charges or the charging methodology used to determine these, please contact Dave Bayliss on 01926 656853 or email our charging team at .box.NTSGasCharges@nationalgrid.com.

Yours sincerely

Steve Fisher
Commercial Operations Manager
